

## NEEL 47 TAKES MULTIHULL AWARD

The Neel 47 trimaran was elected the multihull of the year 2020, in the 40 to 50 foot category. A European award organised by a multihull magazine and the French International Multihull Show.

Neel Trimarans congratulated and thanked the voting public and the organisers of the prize; along with the employees of Neel, the Marc Lombard Design architectural firm, the owners who have put their trust in the brand.

This is a reward for the company, which has been designing and building trimarans for ten years.

The company believes the success of the Neel 47 is based on the successful combination of an unusual and comfortable living space on board, along with performance passage at sea.

This model is distinguished by its original layout, named by the designers as the 'cockloot', which harmoniously combines the cockpit and the saloon to create a unique half-indoor, half-outdoor, single-storey living space.

The full beam cockpit includes generous dimensions as a real call to conviviality. The original layout of an independent suite in each starboard and port float makes cohabitation on board particularly harmonious.

Finally, the owner has his cabin on the same level as his extra large bathroom.

Neel claim it is the ideal travel boat: spacious, comfortable, safe and manoeuvrable, even with a small crew. About thirty owners have already placed their orders with Neel Trimarans.

## ADVENTURES AHEAD

Aventura Catamarans was to unveil its Aventura 37 catamaran plus celebrate its 20th anniversary at the International Multihull Show in France, however the Covid19 decided otherwise.

This 37 foot catamaran was designed by Lasta Design Studio for naval architecture, interior and exterior design. Despite a size less than 40', the Aventura 37 has all the ingredients of a cruising catamaran, but also a twist of performance.

Available in three cabins version with two bathrooms, 3 cabins and 3 bathrooms, 4 cabins and 2 bathrooms or for the rental market in 4 cabins and 4 bathrooms, which is extremely rare in this size.

Storage space has not been forgotten, including a 260 litre fridge, plus dishwasher and many large cupboards. All the cabins have fitted wardrobes and the master cabin even has a dressing room. On deck, numerous and large chests allow you to organise all equipment without any difficulty. The storage capacities are also important: 500 litres for water; 500l for diesel.

All Aventura catamarans are also performance boats; the Aventura 37 has the sail control pit, including Harken fittings and winches, separated from the helm station. The helm station also has direct access from the cockpit with guaranteed comfort and safety.

The relaxation areas have not been forgotten either with a forward sun deck, rooftop sun deck with lateral access, integrated plancha site and a real outdoor saloon for eight people.

Available in Australia via the Australian Marine Network.

RRP: \$595,000
