

NEEL 43

FOR THE PLEASURE OF SAILING

The NEEL 43, announced last June, is the smallest model of the range, replacing the 45. More compact obviously than her big sisters, the 43 will still have a high freeboard and a very similar nacelle in terms of design. The central hull adopts a pronounced rocker to be able to increase the volume. On the water, this trimaran proves to be fast and high performance at the helm. For the interior, the choice to focus on open spaces is totally coherent with the idea of blue water cruising as a family. One innovation: the use of bio-sourced and recyclable materials.
